

2024학년도 제2학기 외국어시험 문제지

감독자확인		2024. 10. 10.(목) 시험시간 19:00~20:10(70분간)					
시험과목	영 어	대학원명	학 번		전공명	성명	

※ 다음의 영어 지문을 한국어로 번역하시오.

1. Restaurants are in business to make money, and calorie-counting is not at the top of their list. Large chain restaurants have corporate chefs whose sole responsibility is to create mouth-watering, can't-put-down food. Calories, fat, carbohydrates and many other nutrient values that are recommended are typically lost in the sea of making the tastiest dish with little regard for nutrition. Two fried chicken patties used as a bun with cheese and mayo stuffed in the middle is being sold in a major chicken chain. Another chain sells an awesome Asian salad as far as taste goes, but with its toppings and salad dressing, it has more than 800 calories. At a restaurant, you have almost no control over how most items are prepared, leaving your health and wellness in the hands of the chef in the back. However, at home, you control how much salt is being used, what fat you use to cook with, the quality of the food product and most of all, you're in control of your health and wellness.
2. Climate change refers to long-term shifts in temperatures and weather patterns. Such shifts can be natural, due to changes in the sun's activity or large volcanic eruptions. But since the 1800s, human activities have been the main driver of climate change, primarily due to the burning of fossil fuels like coal, oil and gas. Burning fossil fuels generates greenhouse gas emissions that act like a blanket wrapped around the Earth, trapping the sun's heat and raising temperatures. The main greenhouse gases that are causing climate change include carbon dioxide and methane. These come from using gasoline for driving a car or coal for heating a building, for example. Clearing land and cutting down forests can also release carbon dioxide. Agriculture, oil and gas operations are major sources of methane emissions. Energy, industry, transport, buildings, agriculture and land use are among the main sectors causing greenhouse gases.
